# Living structures

With Sandstone, Bauscher demonstrates the vitality of natural stone structures. In three color nuances, the pattern concept is based on a subdued tone-on-tone effect ranging from gentle beige to intense anthracite. Mimicking nature, the surface looks deceptively real. The change from silky matte surfaces to shiny structures generates shimmering effects. Sandstone unfolds its irresistible charm in interaction with other natural materials. The

combinations enhance the rustic quality of the stone look. This is staged differently in each article – with a variation that reinforces the natural character of the pattern concepts.
