

“Konkret!”

The XXL bowl “Konkret!” is available on page 49.

DESIGN
by
ZIEHER

The displays consist of a mixture of fibreglass and stone and therefore offer the deceptively genuine optics of concrete combined with low weight and high stability which greatly facilitates handling. The puristic flair of that system will be intensified by using glass plates. Those and other variations made of laminated plastic, slate and carbon are available on pages 54 to 65.

"Konkret!" - Distinct design for highest flexibility!

Plain lines, neutral shapes and two different colour variations put your food presentation into focus and offer a maximum of flexibility while at the same time using the available space at your buffet most effectively. Maximum reduced shapes in combination with the rough look of concrete – "Konkret!" blends in particularly well with modern architecture. "Less is more" is the motto!

The well-known light grey version is now available in an improved quality and has been supplemented by a dark grey version. Starting with this catalogue, both variants feature five additional sizes.

A real eye-catcher is the double-walled XXL bowl in dark grey colour. The impressive diameter of 100 cm creates space for various drinks or chilled dishes (page 49).

The glass bowls are available on page 173.

The XXL bowl in dark-grey concrete look inspires by its enormous size and the little weight. In empty state it can easily be carried by one person. A filigree, but extremely solid stand made of galvanized and powder-coated steel forms the perfect basis. A round glass plate separates ice from melting water and creates at the same time space for the Zieher rechargeable LED-light (page 39), which allows the illumination of the ice in striking colours. No matter if placed on the buffet table or on the stand - this bowl will leave a permanent impression on your guests!

Available as of May 2016!
