

# "Neo"

The optionally available LED-lights (pages 38 and 39) – either rechargeable or cabled – are the ideal completion to put "Neo" into perspective. By using the waterproof (up to 1 m) and remote-controlled rechargeable LED-light it is also possible to illuminate the ice in the iceboxes from below – a really fascinating view. A big choice of LED-light colours guarantees spectacular effects!

The glass platters of the series "Ice" are available on page 171.

The trays and bowls of the series "Artisan" are available on pages 80 and 81.

The buffet system "Neo" is made of anthracite coloured resin. The matt surfaces and softly rounded edges of these translucent cubes appear unobtrusive and modern. "Neo" unfolds its true potential when the columns are effectively illuminated. A wine cooler resp. cloche made of the same material (page 23) is a beautiful complement and blends harmonically into the system.
